OTI Saturn 5000 Contactless Payment Reader

The OTI Saturn 5000 tap and pay terminal could be your best choice if quick transactions are important to you. Contactless payment processing is becoming more and more popular, and the OTI Saturn 5000 is one of the most trusted readers.

The OTI Saturn 5000 contactless reader relies on a secure internal memory and a small antenna embedded in a device that communicates with a reader through a contactless radio frequency interface. The OTI Saturn 5000 is designed to allow for consumer to "tap and pay," eliminating the wait for credit card authorizations and signature collection.

The Saturn 5000 provides a solution for:

Payments – Cashless solutions for small tickets items
SmartID – Contactless credentialing and verification
Petroleum – Fuel management and petroleum solution

With the Saturn 5000, no signatures are required for transactions under $25, leading to faster transaction times and improved customer transaction volume. You can develop a competitive differentia.

HIGHLIGHTS

- **No signature required for transactions under $25.**
- **Faster transaction times.**
- **Improved customer transaction volume.**
- **Less time waiting in line for your customers.**
- **Minimal shelf space**
- **Easy to connect to already-existing infrastructure and POS terminal; quick upgrade without disrupting on-going business operations.**
- **Low maintenance: Since contact does not take place between the card and terminal, normal terminal wear and tear does not take place.**
- **Ability to read credit cards and key fobs (hooked on key chains).**
- **Proximity Range: Up to 4 inches (10 cm).**
