

# Hypercom T4210

## Credit Card Terminal

The Hypercom Optimum T4210 offers a powerful dial countertop solution with a small footprint. With a large memory capacity, rapid transaction processing and multi-application capabilities, the T4210 provides merchants a high-end device at an affordable price.

The Hypercom Optimum T4210 is functional for most businesses, including hand-over environments. PCI PED approved, the secure T4210 can support debit transactions with or without an external PIN pad and can accept value added applications to meet the business needs of today and tomorrow.

The T4210 has high-end features normally found in only more expensive IP and wireless models, such as 24MB of total memory, an ARM9 processor for fast transactions and also multi-application. With one of the most slim form factors of any countertop device, it is also perfect for handover environments. The unique modular design of the T4210 protects your investment while you grow.
