

VeriFone Vx510

Credit Card Terminal

The VeriFone Vx510 Credit Card Terminal is an advanced, yet easy-to-use device. With high-speed transaction processing, multiple payment applications, and the most reliable security protections, the VeriFone Vx510 terminal provides exceptional performance and functionality.

Designed with a small footprint for easy handling, this product combines a mag-stripe card reader, high-speed thermal printer, and internal PIN pad with a user-friendly ATM-style interface to minimize costly errors.

PRODUCT FEATURES

- Triple-track card reader handles most magnetic-striped cards, including mini-cards
- Integrated, high-speed thermal printer is quiet and easy to load
- Compact, small footprint design
- Three-track magnetic stripe card reader with support for contactless payment processing
- 32 MB RAM memory capacity
- 3 USB ports and 1 serial port for peripherals and potential expandability
- Address verification service
- Quick and simple installation
- Six durable screen-accessible keys
- Secure Sockets Layer (SSL) encryption
- Fast, hassle-free drop-in paper-loading

VeriFone's VX 510 is PCI PED approved and offers extraordinary performance that dramatically reduces transaction time to just a few seconds.
