

Verifone Omni 3750

The VeriFone Omni 3750 Credit Card Terminal offers everything one would need in a credit card machine including optional IP based processing for faster transactions. In fact, transaction times can be reduced to as little as 4 seconds; the fast printer and processor chip help send customers through check-out lines quickly and efficiently.

The convenient, all-in-one design of the VeriFone Omni 3750 combines a mag-stripe reader, smart card reader, internal PIN pad, and quiet, fast thermal printer. This makes the Omni 3750 easy to install and keeps your countertop clutter-free. It can also support more value-added applications like pre-paid phone cards, loyalty programs, gift cards and age verification can help improve customer service.

HIGHLIGHTS

- » Dual Mode communications (IP and dial-up)
- » Intuitive ATM-style interface, large backlit display, large keys, and easy-to-read menu prompts reduce training
- » Integrated, high-speed thermal printer with “clam shell” design features drop-in paper-loading
- » A flashing LED alerts clerks to low-paper levels
- » Securely supports payment and value-added applications such as gift cards, loyalty, advertising, and age verification
- » Omni 3750 terminals running SoftPay EMV software are EMV Level 1 and Level 2 compliant
- » Tamper-evident casing resists unauthorized intrusion and a broad spectrum of security features protect you against fraud
- » Support for all VeriFone PIN pads, check readers and smart card peripherals allows you to expand options as your payment needs evolve
